* (Note1) The sensing distance is a standard for Red LED of BF4 Series and 10% of Red LED is applied when it is Green LED.
It is applied to 40% of sensing distance for BF3RX.

* (Note2) Min. sensing target is a value measured opaque material in accurate output status and the sensing distance is different with the rated sensing distance (Note1).

* (Note3) Fiber optic cable out of the rated length can be customizable.

* **Free cut** The sensing distance can be shortened about max. 20% than the normal according to condition of the cable.
[FC-2] should be used for cutting fiber cable.]

* **Glass type** is for BF5R, BF4R Series.
